(54) Title: DIGITAL BROADCAST METHOD AND SYSTEM FOR SUPPORTING DVD RECORDING AND RELEVANT RECEIVING AND RECORDING METHOD AND DEVICE

(57) Abstract: A digital broadcast method and system for supporting DVD recording, and relevant receiving and recording method and device are disclosed. A navigation data used for forming a DVD program is loaded into a private data stream of a TS stream transmitted by a broadcast system to let the system of the present invention be compatible with existing digital broadcast systems. A receiving end receives the navigation data when receiving audio data and video data. Therefore, it is possible to record the program in a DVD format so that a user enjoys the same feature-rich scanning function as issued DVDs when replaying programs.
